THE L STEP: LISTEN AND LEARN RESOURCES AND NEEDS WHEELS

Some of the **resources** you may hear as you listen might include recognizing that the person:

- is in a safe and healthy physical environment
- is intellectually sharp and thinking through the issue clearly
- has lots of information and tools to use in solving the problem
- has support from family and others
- is physically and emotionally strong
- is not being abused or threatened by another person
- is not addicted or mentally ill
- has a strong sense of right and wrong
- has a strong spiritual and faith foundation
- has good communication skills and can express himself or herself fully
- feels valued and loved by God and by others

Some of the **needs** in the person you are listening to are the reverse of these resources.
